▦ Publications

Building a Jarvis-Inspired AI Assistant with Python: A Step-by-Step Guide (Linkedin)   Oct 02, 2023
Mohamed Abdul Aziz

    I mentioned my experience in using Python to develop AI applications with this AI Assistant, making it easy to understand and kickstart your AI projects on your computer.

🗀 Projects

Virtual Conversation AI Assistant   Sep 2023
Python

    I developed a virtual artificial intelligence system using Python, leveraging several frameworks for voice command communication:

- Pyttsx3 for text-to-speech capabilities (Speaking)
- Wikipedia for accessing information
- Google for web searches
- Speech Recognition for voice command recognition.

Login Authentication   Jan 2023
PHP

    I have been using **PHP to implement login authentication,** connecting it to an **SQL database for processing** user login authentication from the existing front end of the page. This allows for both the creation of new user accounts and login for existing users.

Pharmacy store   Nov 2022
Wordpress

    I developed an **E-commerce website on WordPress** for my friend's college project. It featured impressive animations and product listings, although it didn't include a payment gateway for transactions.

IOT   Dec 2021
Ardiuno

    I developed a **smart blind stick using Arduino**, which a person **automation to produce sounds when any object comes within a 9-foot distance**. This functionality is managed through coding, utilizing components such as an **ultrasonic sensor, buzzer, vibrator, and Arduino Uno.**

Build Railway reservation   Apr 2020
C++

    During my second year of college, I successfully created a **Railway Reservation System** as my first small project. This system allowed users to perform various functions such as **booking tickets, canceling tickets, checking train availability, seat availability,** and included an **admin dashboard for management**.

School Webpage   Feb 2021
HTML/CSS/JS/Bootstrap/PHP/MySql

    I was created static webpage using this programing technology's to show section in single page website -Home-About us-Services-Alumini-Gallery-Contact us this are the features are available to this webpage best part is Alumini can register their details to show with their friends.

⌨ Worshop
